EDITORIAL

We are proud to present our first quarterly bulletin “elevate” from January to March 2024. Apart from the academic activities, our institute performs numerous extra-curricular and co-curricular activities. Main objective is to document and highlight the range of extra and co-curricular activities offered by our institute. This bulletin serves as a comprehensive record of the diverse array of activities organized by the college to enhance overall development of the students as well as the people in our vicinity beyond the classroom. Our second quarterly edition of the bulletin will converge the activities from April to June, third edition will wrap July to September. Our last quarterly edition will concatenate the month of October to December and so on.

We extend our gratitude to all participants, organizers, and stakeholders for their contributions to making these activities a success.

With thanks and regards,

Editors

Mega Cleanliness Drive

We at Golaghat Polytechnic try our level best to maintain cleanliness of our campus and its surroundings. On 9th February, 2024 we organized a meticulously planned Massive Cleanliness Drive considering the forthcoming institute week 2024. For that we divided the campus in different blocks (23 blocks) namely A, B, C, D, etc. Each block was assigned to a group with a team leader who is a teacher. The team comprised of a team leader, one Gr. IV employee and 15 to 20 students. All the teams involved themselves with enthusiasm and with a feel of belongingness for 3 hours starting from 10 am to 1 pm. It was a great feeling for everyone to see their institute in a clean and tidy shape. This is not the first time that we have organized this drive. We also do it periodically. Back in 2nd September 2018 we organized such a massive drive to clean the campus primarily to remove the construction debris dumped by the contractor who constructed the institute.

Dr. Gautam Borthakur

Institute Magazine: Technica

From overseeing the institute magazine team to witnessing the inauguration of the second edition of our institute's annual magazine "Technica" on February 19, 2024, the journey is one of anticipation and fulfillment. As a teacher, guiding students through the entire process involves meticulous planning, constant support, and occasional redirection. Despite facing challenges that led to a delay in publishing, including unforeseen issues, the team persevered with determination. With invaluable assistance from Principal Sir and other faculties, who provided guidance and support, the team navigated through obstacles with renewed determination. From brainstorming sessions to late-night editing marathons, every moment was a testament to the team's dedication and resilience. As the inauguration approached, there was a palpable sense of relief and excitement mixed with nerves. Ensuring that the final product reflected the hard work and creativity of the team became even more paramount. When "Technica" was finally unveiled, there was a collective sense of pride and accomplishment among the students and faculty alike. It was a moment to celebrate not just the publication, but also the growth and camaraderie fostered throughout the journey.

Training and Placement Activities

In the first month of this quarter, the Training and Placement Cell of the Institute organised a training program on AutoCad at Institute campus for the students of Civil and Mechanical Engineering departments with an objective to perk up their technical skills. In addition to that a weeklong soft skill development program was also being organised for the female students of the final semester in collaboration with Mahindra Pride Classroom. It was a successful program whereby the students learnt how to prepare themselves before facing an interview. In relation to that, Mahindra Pride Classroom even conducted a 'mock interview' session for those students in the following week. In the second month, the Placement Cell invited Subros Ltd. to conduct a campus Placement drive for the passed out as well as final year batches of Golaghat Polytechnic as well as few other nearby Polytechnic Institutions like Sivasagar Polytechnic and H.R.H POWEIT. A total of around 70 students participated in the drive, among which several students were selected by the company. Apart from that, several students are taking up free online courses like Business Management, Cybersecurity, etc., offered by Tata Strive as part of their extra-curricular learning and to keep themselves in pace with the technology driven world.

Like every year, several students from the Institution have been selected for several reputed companies like Bajaj Auto, Ceat Tyres, Max Cement, Duraguard Cement, Tata Cancer Care Foundation, Genworks among others.
